Interconnecting safety here and around the world

Ron Fire Systems, Inc. is a Fire Protection Contractor servicing the South East Asia and Africa region. Ron provides firefighting, fire detection and alarm system services for the industrial market ranging from light manufacturing to heavy industrial facilities. RON specializes in the protection of facilities that handle, manufacture, and store hazardous materials from local to international clientele. RON understands that its clients are operating in a highly competitive global economy making it essential that their facilities not only operate safely, but cost effective.

Building safety compliance is critical to service companies, building owners and fire and safety officials who are charged with safeguarding occupants. BuildingReports' mobile and online inspection reporting tools enable inspectors to quickly gather data on fire and life safety devices to ensure the working order and code requirements through easily verifiable inspection reports.

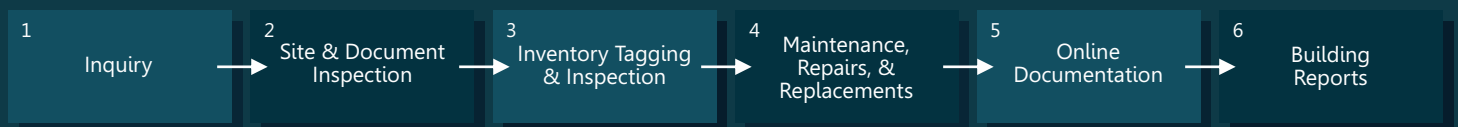

Accessible building inspection reporting. BuildingReports can help building owners and property managers ensure that the fire and life safety systems installed at their location are working and in compliance with local regulatory standards.

Intelligent system analysis. It provides other features to help you get an accurate picture of all your fire and life safety systems in your property.

Online access to building compliance history. All compliance data is stored on our secure web-servers, backed up daily and archived off-site.

Single-source of multi-location qualified inspectors. BuildingReports can help you find the right organization to meet your safety inspection needs, regardless of location, size or complexity of facilities involved.
